No... Just no.... Not much of a storyline - and the gameplay is very quick...but it was worth it for a hidden object game.. As someone mentioned, some of the puzzle doesn't work. I had the issue with the Statues, but using the skipping button I was able to progress in the game. The game was ok, but I guess easy to forget.

The hidden objects were just hidden well enough that you can't just click around and hope to hit them.

The story was interesting, but very short. I liked the puzzle about the stars the most.

Overall not a bad game (excluding the technical issue), but not the best I have played.

. Bugged out everytime I reached the girl's bedroom - the inventory disappeared - so I couldn't continue.. I really enjoy this game.

this game is from the best puzzles game ever played it story seems good i love puzzles :) i gives that game 9/10. Buggy as hell.... Not much of a storyline - and the gameplay is very quick...but it was worth it for a hidden object game.. This game is very buggy. On one puzzle, you have to use an item from your inventory. However, as soon as I did, the item disappeared into thin air, leaving me unable to solve the puzzle. I had no other choice but to use the skip option to continue playing. Others have reported this as well.

The puzzles are very easy, the game as a whole is not very challenging. As far as the story goes, it's very shallow. And if it wasn't for the game continuously telling you that you play as a little girl, you would never know, because she doesn't act as a little child at all.

Looking at the price of this game, I would say, there are better hidden object games for sale for less money.. Well the flower puzzle is broken so I would give it 0 with potential for improvement if fixed so that it could be played.. Buggy as hell.... As someone mentioned, some of the puzzle doesn't work. I had the issue with the Statues, but using the skipping button I was able to progress in the game. The game was ok, but I guess easy to forget.

The hidden objects were just hidden well enough that you can't just click around and hope to hit them.

The story was interesting, but very short. I liked the puzzle about the stars the most.

Overall not a bad game (excluding the technical issue), but not the best I have played.

. Other negative reviews are fairly accurate.

Game is short. Story is disjointed and hard to follow. Text is poorly edited (though that's practically a feature of the genre, right?). Puzzles are, for the most part, almost boringly easy., but I still had to skip a few because they bugged out. HO scenes are nice but it feels like you're finding the same objects over and over.

Overall, I don't regret playing it: it was an adequately fun way to spend a few hours (notably longer play time cause I left it running while I ate dinner, and played with my dog, and read Facebook). I won't replay it, and I wouldn't pay for it again.
